

Solar System Wonders

Our Solar System

Overview of planets,
stars, and more

Center of our solar system's universe

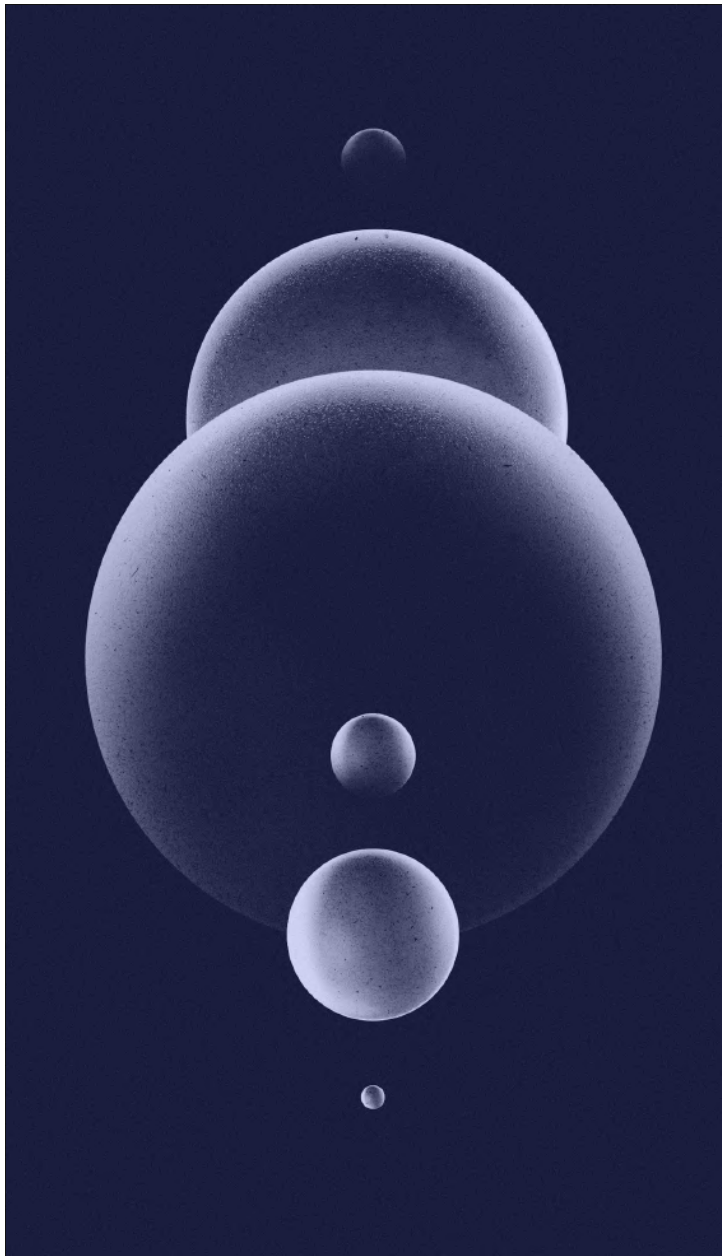

Mercury

Closest planet to the Sun

Venus

Hottest planet in the solar system

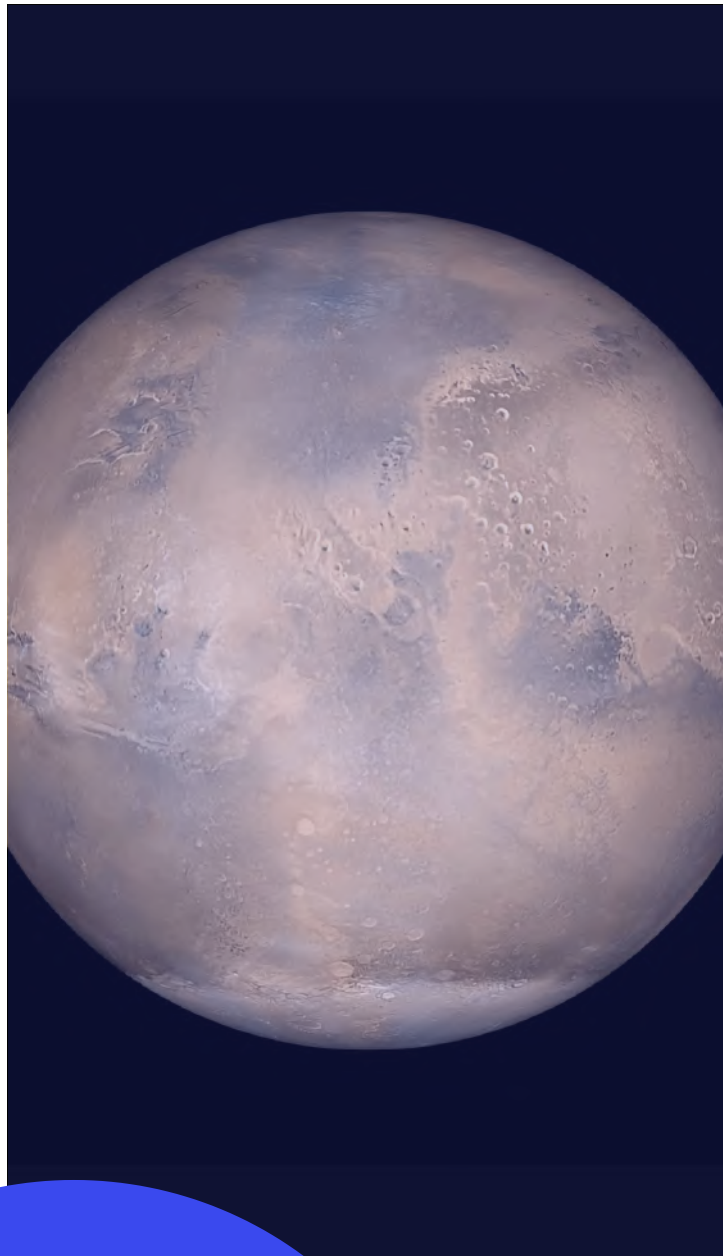

Earth

Our home planet

Mars

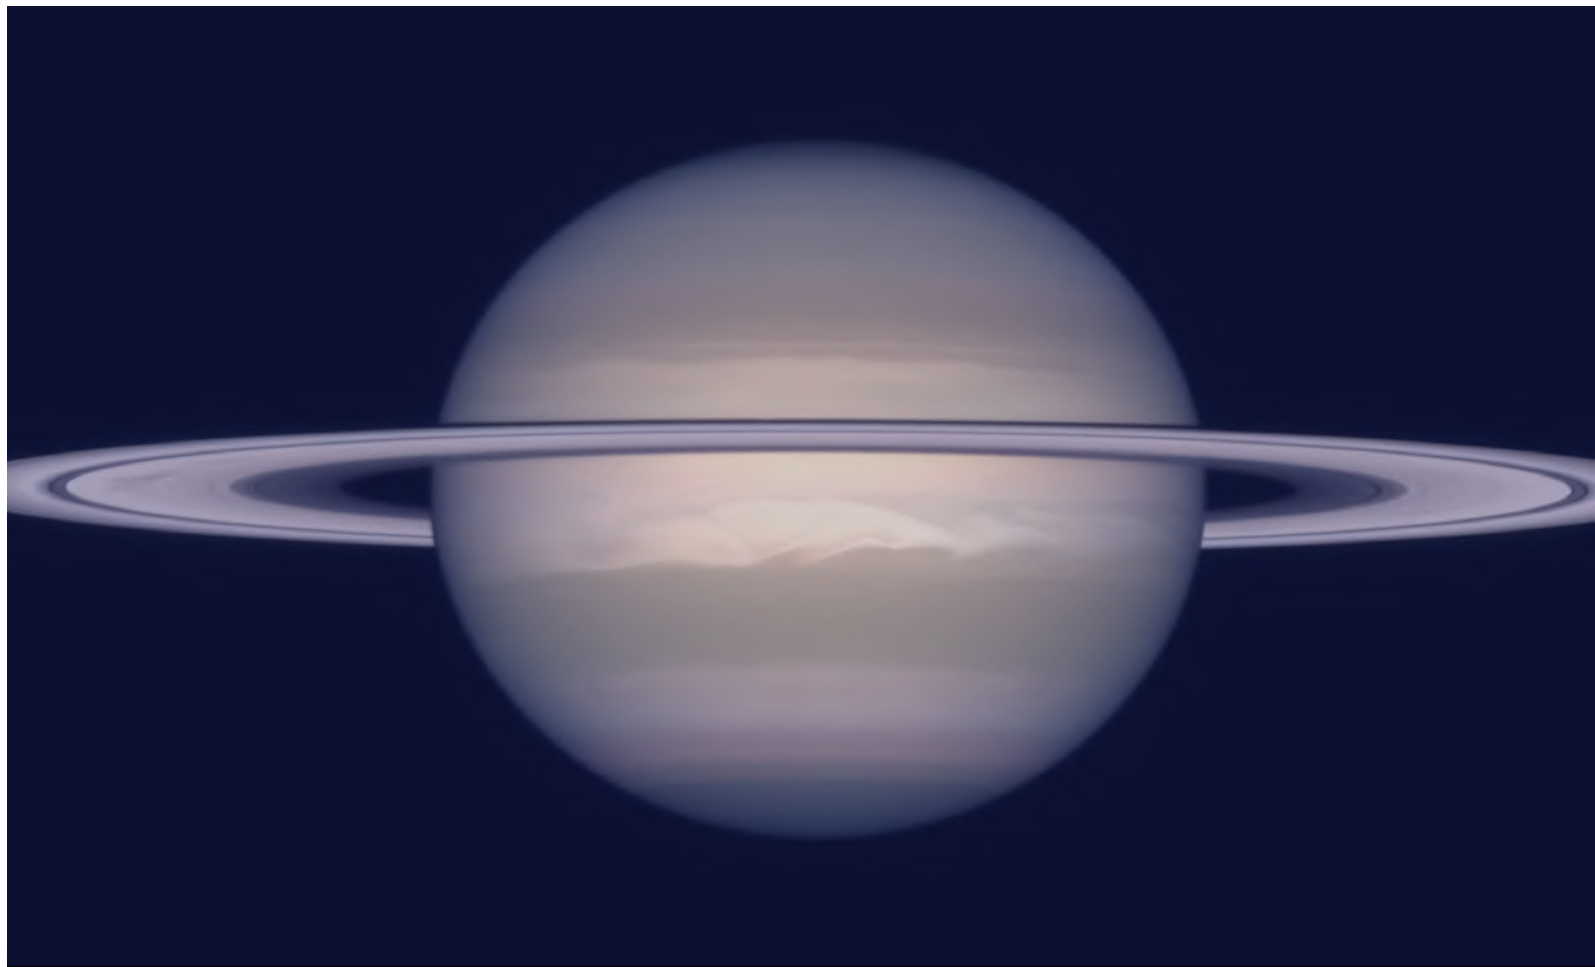

Possibility of past life

Outer Planets

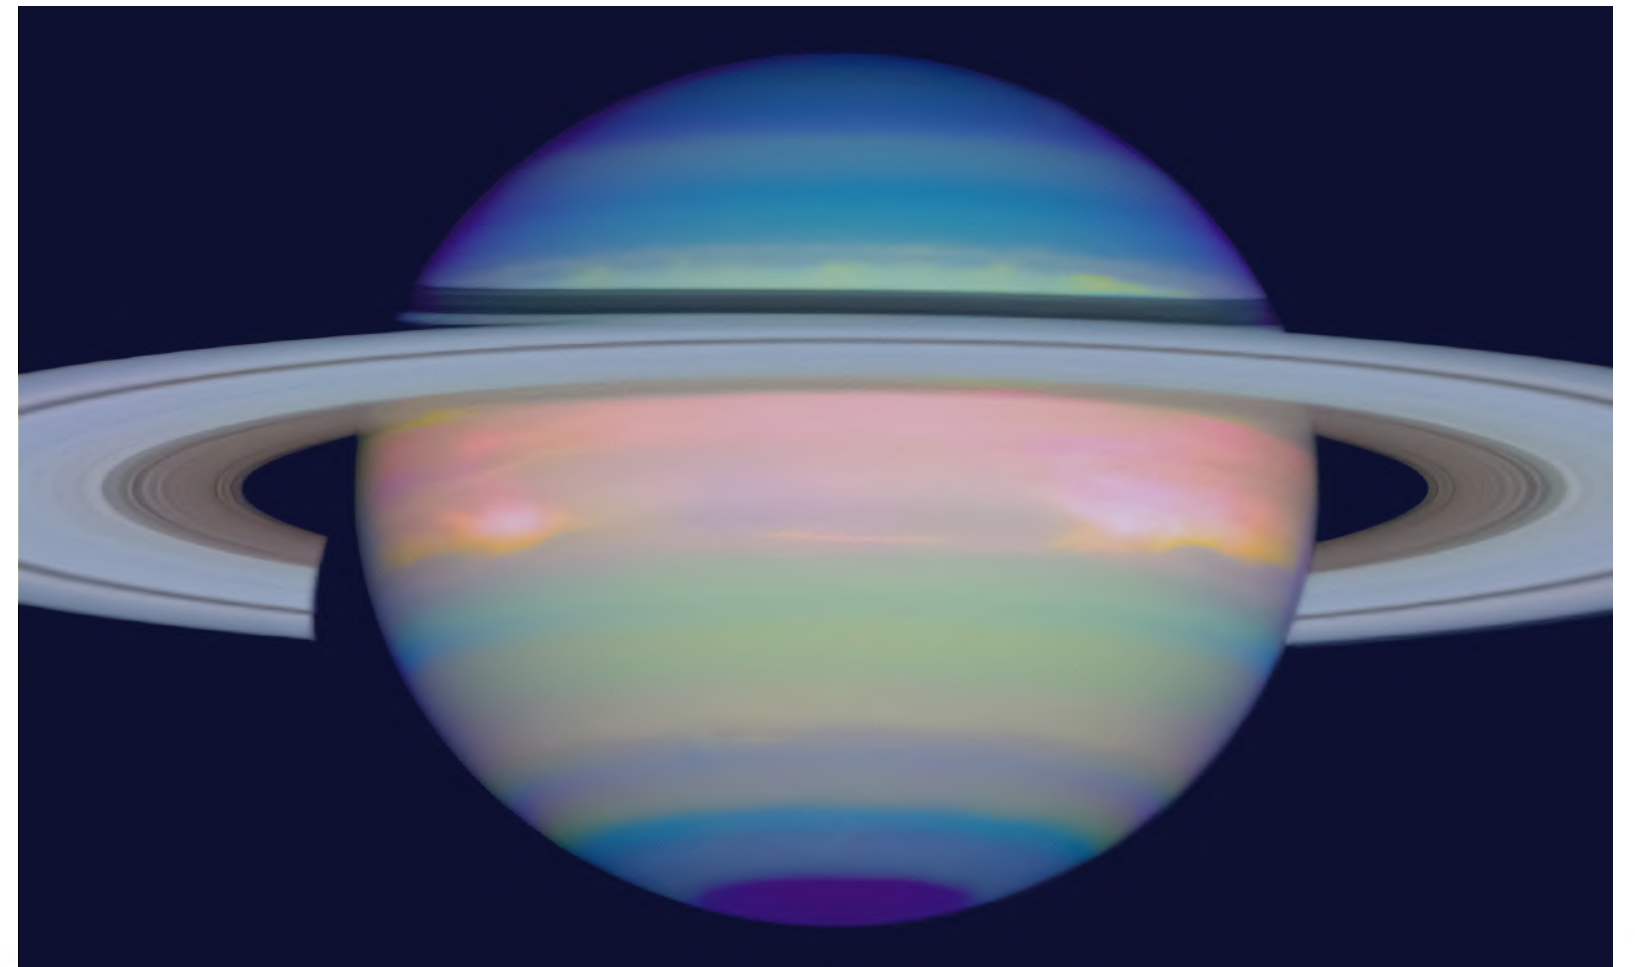

Gas Giants

Jupiter, Saturn, Uranus, Neptune

Ring Systems

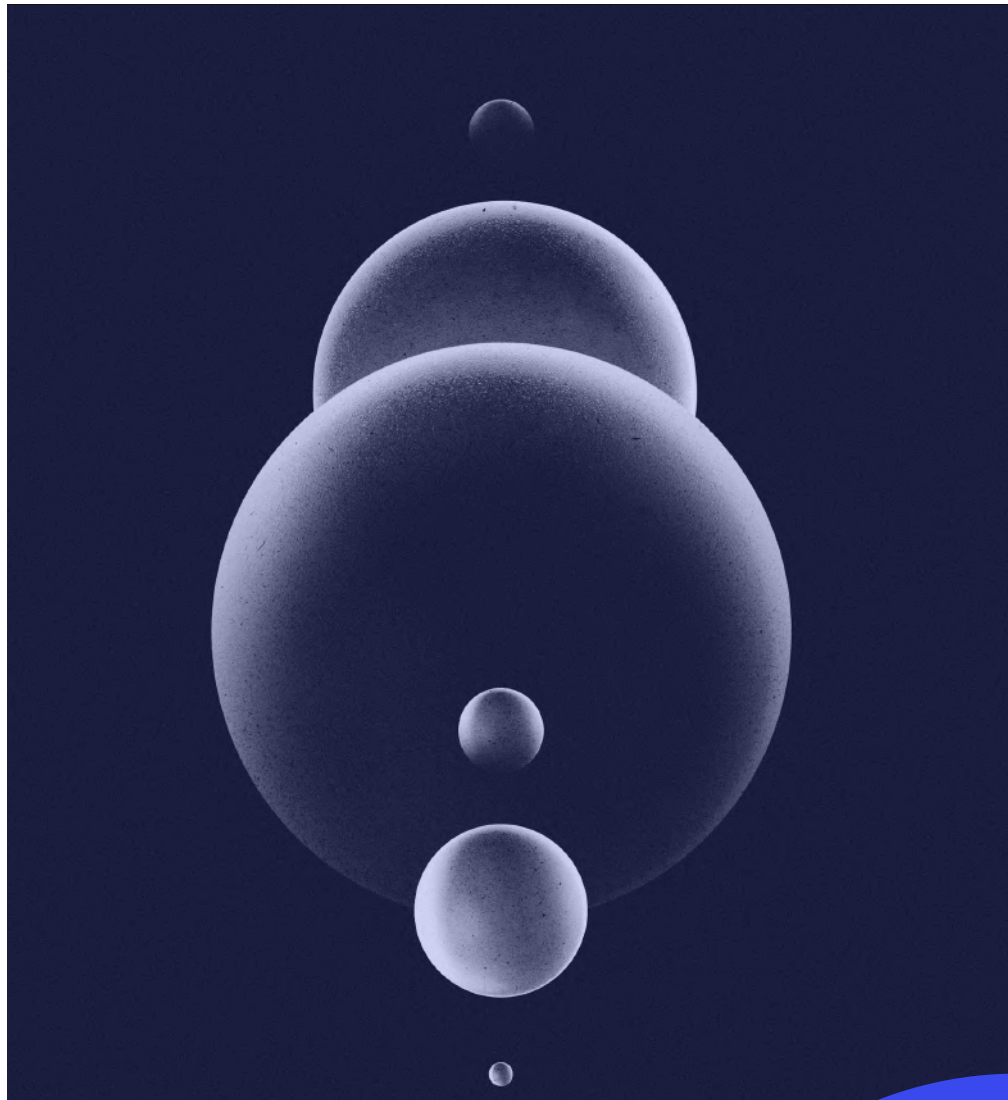

Spectacular and unique structures

Dwarf Planets

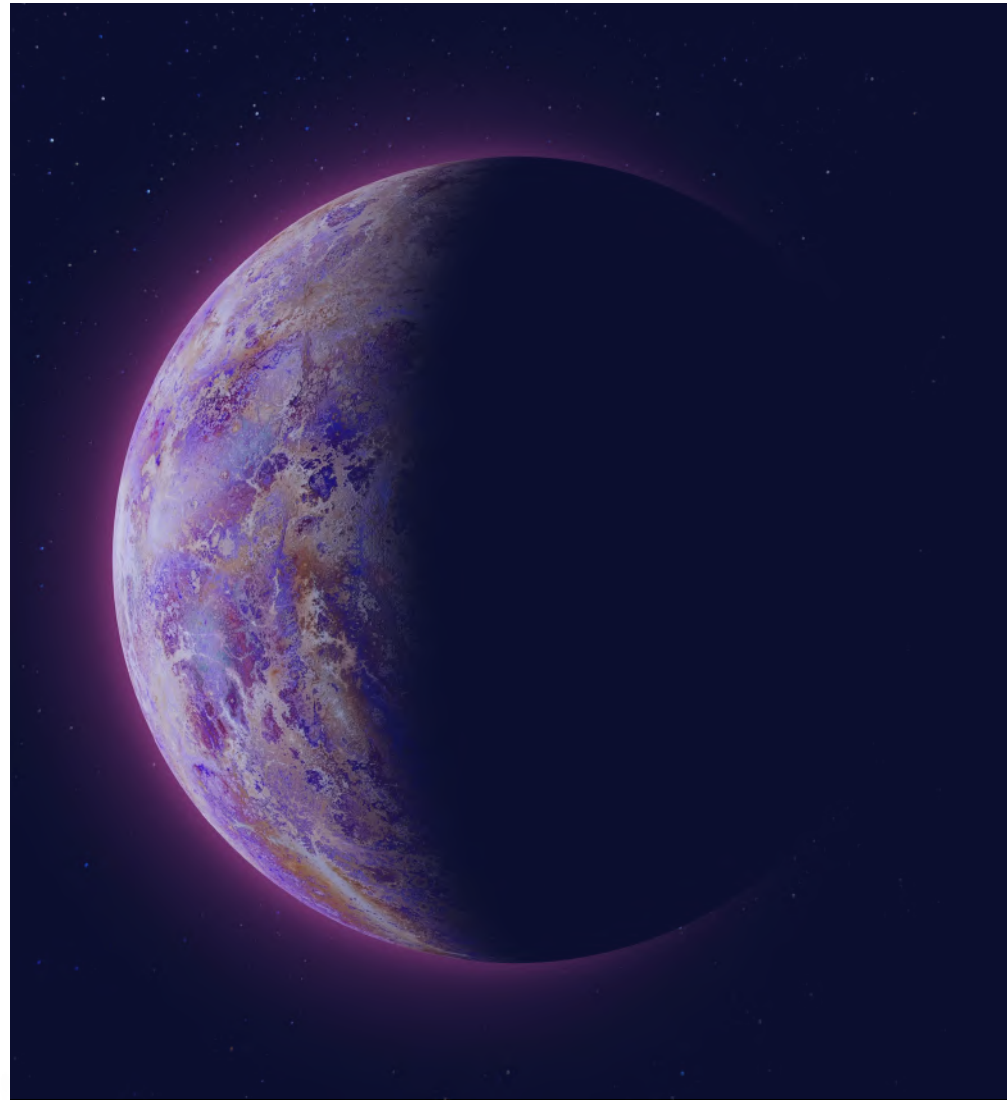

Pluto

Former 9th planet, now a dwarf planet.

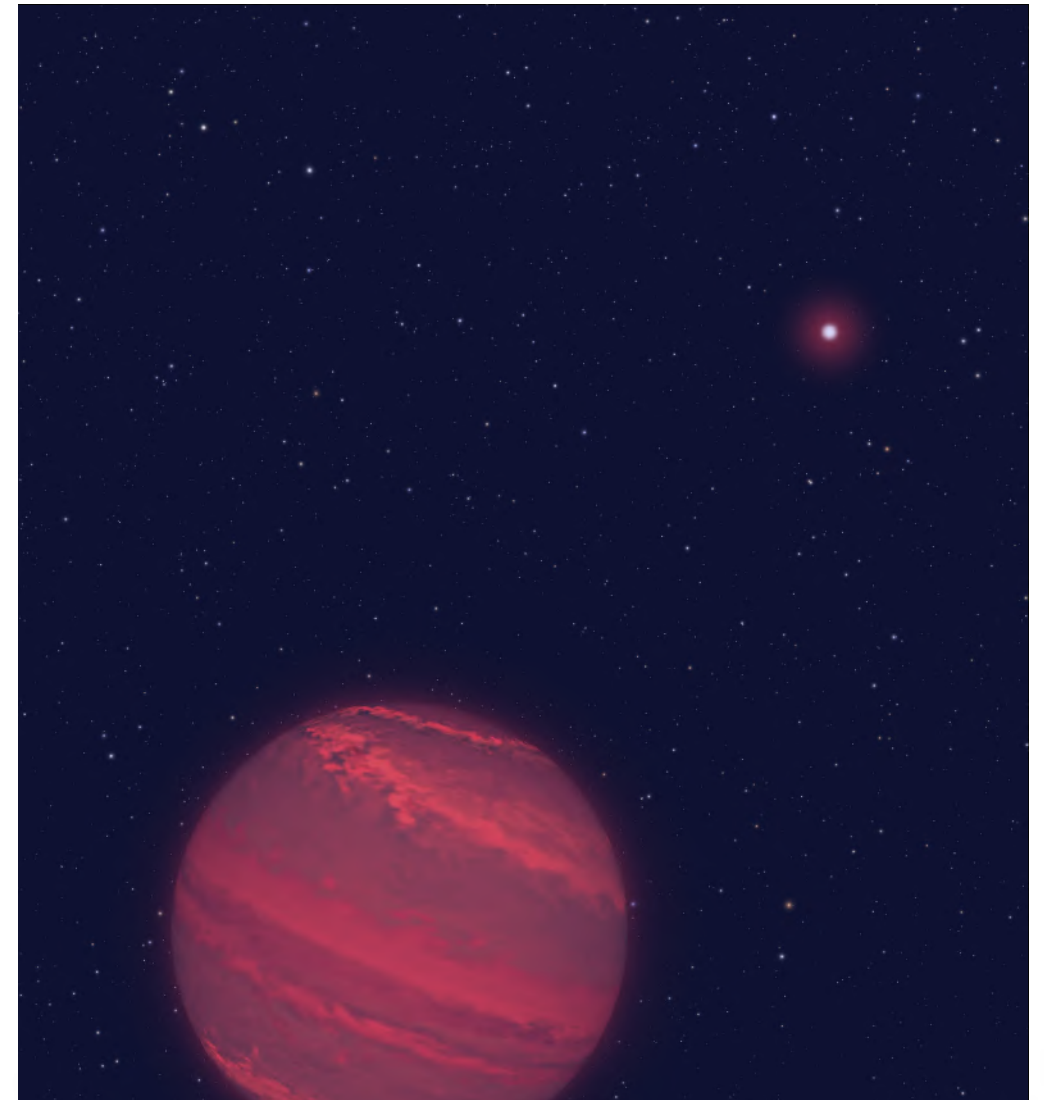

Eris

Discovered in 2005, larger than Pluto.

Haumea

A fast-spinning elongated dwarf planet.

Moon Marvels

Explore the fascinating lunar landscapes and natural satellites of our moon. Discover the marvels of this celestial body that has captivated civilizations for millennia.

Asteroids & Comets

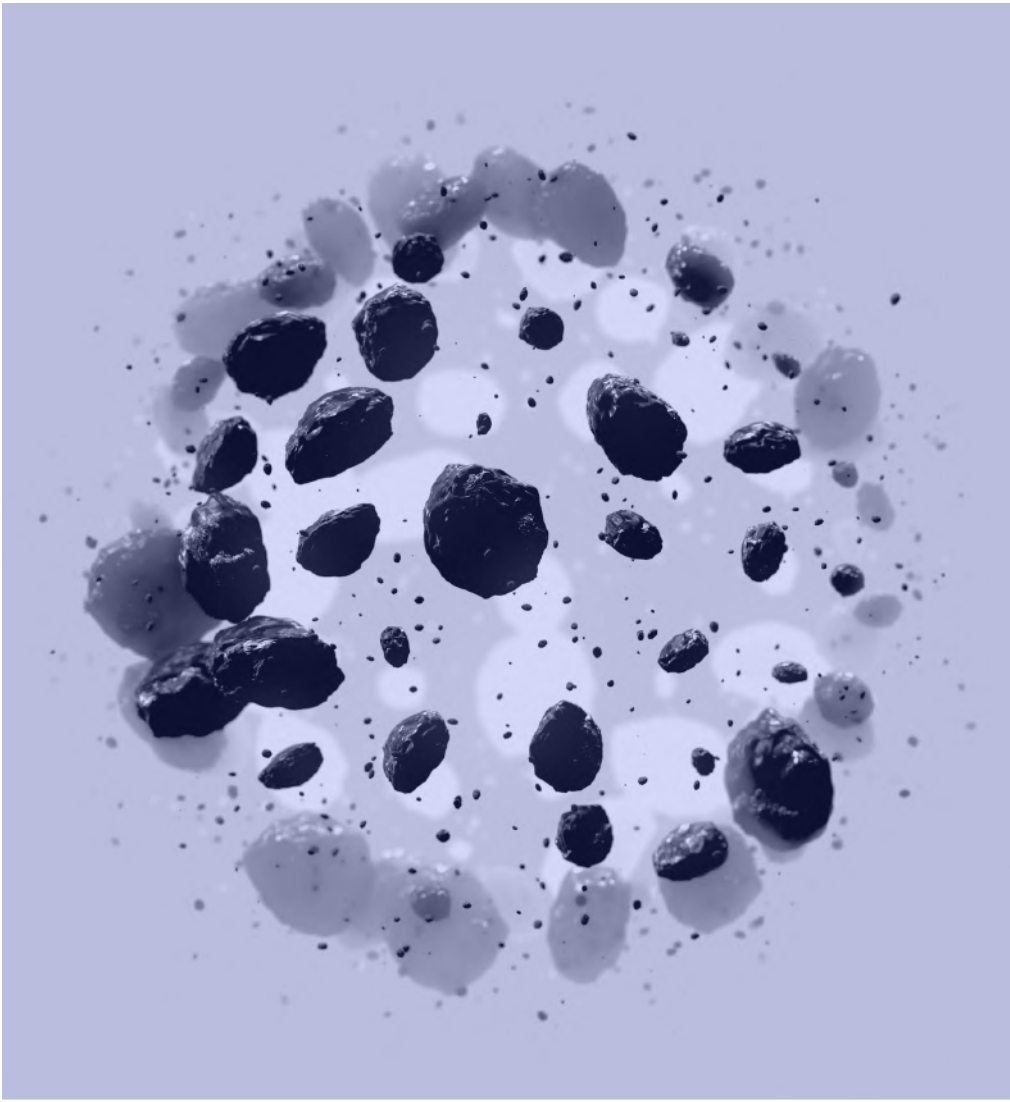

Mysterious

Discover the mysteries of asteroids & comets.

Impactful

Learn about their impact on Earth and beyond.

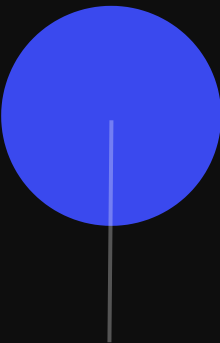

Diverse

Explore the diversity of these celestial objects.

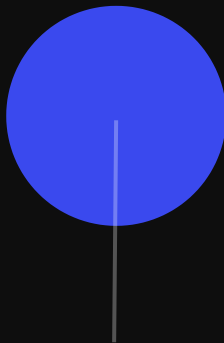

Space Exploration

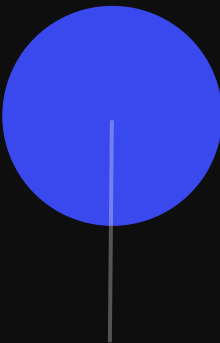

1957

The launch of Sputnik 1 marked the beginning of human-made objects in space.

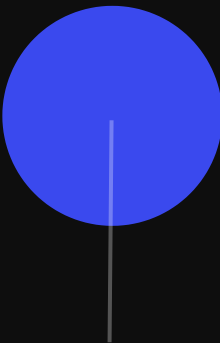

1969

Apollo 11 lands humans on the Moon for the first time in history.

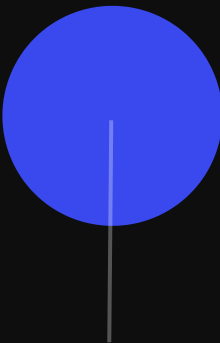

1977

Voyager spacecrafts begin their journey to explore outer planets and interstellar space.

2004

Opportunity rover lands on Mars, providing insights into the planet's geology and history.

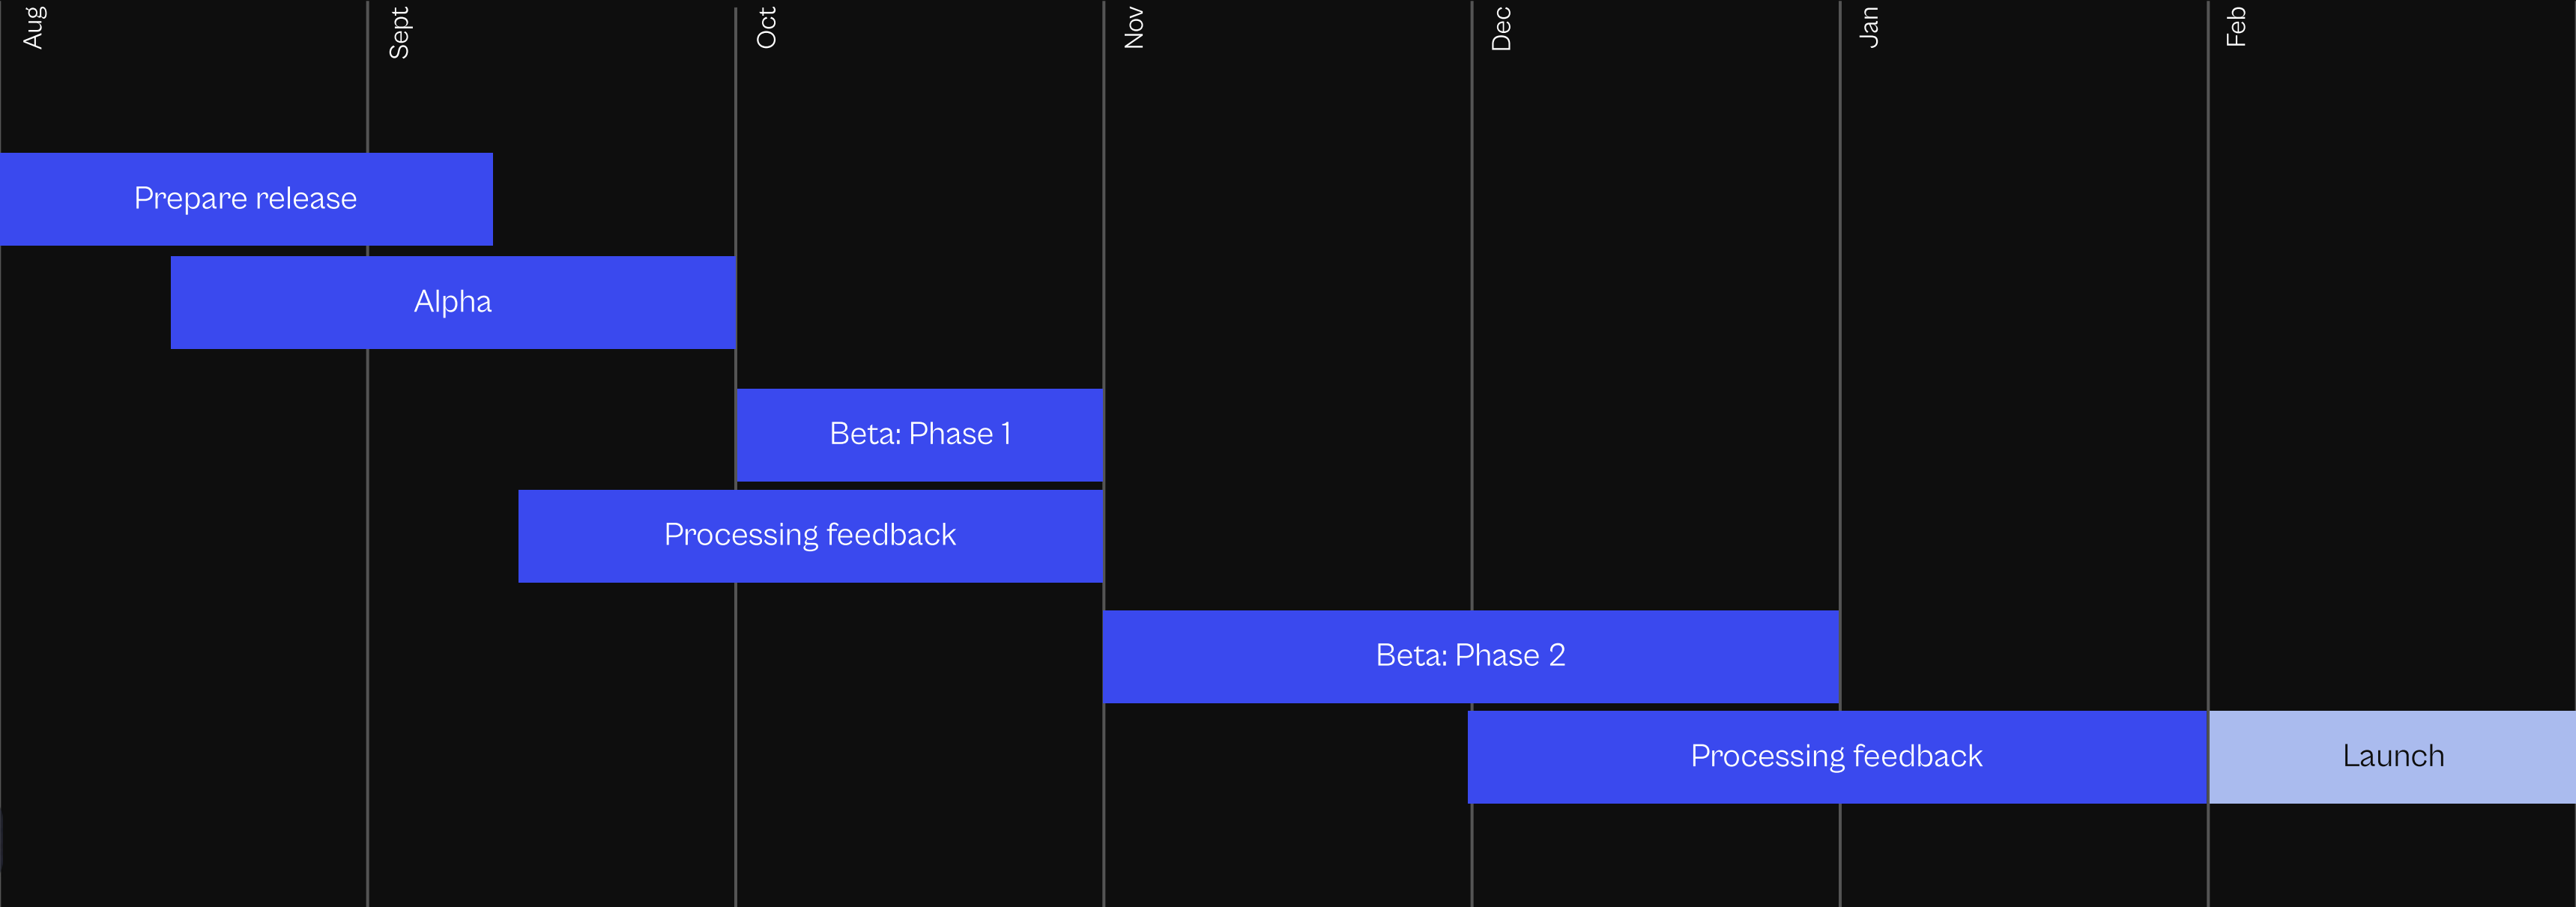

2023

Artemis program plans to return humans to the Moon, paving the way for future Mars missions.

Future Missions

Exciting prospects in space exploration ahead
